Security guidance

1. Please read this safety guide carefully.
2. Please keep the user manual for future reference.
3. Keep the equipment dry and away from the damp environment.
4. Place the unit on a stable surface before use.
5. The opening gap at the bottom of the equipment is used for ventilation to avoid overheating of the components inside the equipment. Do not cover or block this opening.
6. Please make sure that the power supply is: 12V, 3A when connecting the equipment to the power source.
7. The equipment should be properly connected to the ground wire.
8. Please pay attention to all precautions and warnings indicated on the equipment and manual.
9. Do not inject any liquid from the opening, otherwise it will cause serious damage or even lead to electric shock.
10. If the following situations occur, please find technical service personnel to deal with:
 - The power cord or plug is damaged.
 - Liquid infiltrate to the equipment.
 - Equipment is not working properly or the user can not follow the instructions of the user manual to make it work properly.
 - Equipment dropped or damaged.
 - Equipment has obvious damage.
11. Do not place the equipment in the environment which the temperatures above 60 ° C (140 ° F), otherwise it will cause the equipment damage.

Warning!

On the occasion of black out, if machine is without battery back up support, best suggestion is switch off from the power on/off key, and resume the power supply or the power generator kick start, wait for 1-2 minutes until the power stable then switch on your machine! This is protect your machine not be shock dead cause by higher voltage power damage your machine! Best suggestion is with one battery back-up unit protection, if your location is with frequent power blackout occur!

Introduction

This chapter includes the following content:

- About this manual
- Specification
- Main feature
- Keyboard layout

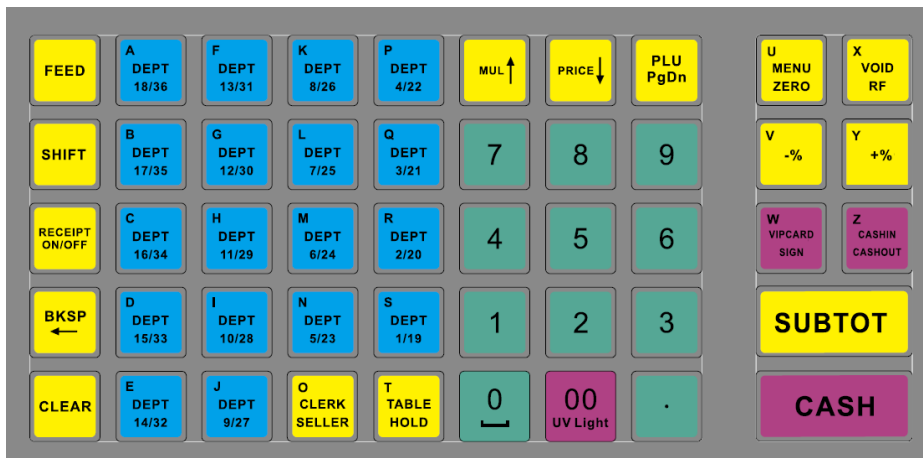

Specification

1. With color LCD screen, which can display 16 characters.
2. Customer display adopts 8-bit bright LED digital tube, which can display 8 digits.
3. The printer adopts line thermal printer core, which can print 32 characters.
4. With 48 keys keyboard.
5. 2 x serial port, 1 x PS/2 port, 1 x USB
6. Android phone views the reports via Wifi.
7. Dedicated computer software connect to machine via LAN.
8. With UV light money detector

Main Feature

1. 36 direct (DEPT) commodities, which can be expanded to 200.
2. 10000 PLUs
3. 50 combinations
4. Max 30 lines of receipt head and tail (printable graphics)
5. 50 cashiers
6. 1,000 VIPs
7. 200 tables
8. 200 signed customers
9. 8 payment methods
10. 9 kinds of taxes

1. Keyboard Layout:

2. Key Name and Usage

Key name	Usage
Num	Input number
FEED	The printer feed a blank line
RECEIPT	Copy receipt; Print programming content
MUL↑	Enter the quantity of goods; turn up
PRICE↓	Enter temporary price; turn down
CASH	Cash settlement operations; 'shift' + 'cash' can open the cashdrawer
SHIFT	Get the second definition value of the key
BKSP	Delete the entered numbers or characters
VOID	Cancel operation
+%; -%	Extra charge; Discount sales
CLEAR	Clears current digital input and the tweet caused by the wrong operation
CLERK	Cashier login and delete single products
SUBTOT (Enter)	Calculate total amount in sales interface Input validation in quotation interface or system programming interface

Key name	Usage
PLU pgDn	Enter the commodity code, then press this key for a single product sales; turn down
DEPT	For the department sales

Initial Installation Of Cash Register

After purchasing, it is recommended that the user first complete the initialization (memory redistribution), and then perform other functional operations, the initialization steps are as follows.

This chapter includes the following content:

- How to connect the power supply correctly
- Initialize the cash register
- Set system time
- Set function parameters of cash register

How to connect the power supply correctly?

- 1) Please confirm the power parameter: 12V, 3A.
- 2) The power (adapter) must be properly connected to the ground wire.
- 3) The user should use dedicated power cord, and the power cord is connected to a separate power outlet;
- 4) Plug in the power plug and then open cash register switch, cash register will show the time;

Initialize Cash Register operation

- 1) Press the "MENU" key to enter the main menu.
- 2) Press "4" + "SUTTOT" to enter "Program";
- 3) Press "16" + "SUBTOT" + "MUL ↑" + "SUBTOT" to enter initial cash register operation;
- 4) Press "CASH" key to return to initial state of programming;

WARNING: Please initialize the cash register before making any other programming on the new machine. This operation will restore the cash register to the factory defaults!

Set System Time

- 1) Press "MENU" key to enter the system main menu;
- 2) Press "4" + "SUBTOT" to enter "Program";
- 3) Press "13" + "SUBTOT" to enter the date and time programming operation;
- 4) Enter "year / month / date" and then press "SUBTOT" to confirm the entry;
- 5) Enter "hour / min / sec" and then press "SUBTOT" to confirm the entry;

Set Function Parameters of Cash Register

- 1) Press "MENU" key to enter the system main menu;
- 2) Press "4" + "SUBTOT" to enter "Program";
- 3) Press "12" + "SUBTOT" to enter the function parameter programming operation (function programming reference programming operation);
- 4) Not need to enter the serial number, press the "SUBTOT" key directly;
- 5) Enter the 1st, 2nd, 3rd function parameter values respectively as follows: "0001", "9600", "0001" (refer to Appendix B for the definition of functional parameters);
- 6) Press the "CASH" key to return to the programming initial state;

System Programming Operation Guide

After initialization, cash register will be able to work properly, but this time all the parameters inside cash register are system defaults, may not able to fully meet the needs of users. In order to achieve the cash register users personalization, need to program the cash register, all the programming operations will be described later.

Note: 1) During this operation, the machine needs to be in the "Program" state;

This chapter includes the following:

Steps	Programming type
"1"+"SUBTOT"	Department programming
"2"+"SUBTOT"	PLU programming
"3"+"SUBTOT"	Bill programming
"4"+"SUBTOT"	Casher programming
"5"+"SUBTOT"	Seller programming
"6"+"SUBTOT"	Table programming
"7"+"SUBTOT"	Suit programming

Steps	Programming type
"8"+"SUBTOT"	Taste programming
"9"+"SUBTOT"	Sign programming
"10"+"SUBTOT"	Payment programming
"11"+"SUBTOT"	Keyboard programming
"12"+"SUBTOT"	Function programming
"13"+"SUBTOT"	Date programming
"14"+"SUBTOT"	Outprint Bill
"15"+"SUBTOT"	VIP programming
"16"+"SUBTOT"	Clear system
"17"+"SUBTOT"	System information
"18"+"SUBTOT"	Tax item programming

Basic Programming Operation

There are three basic programming operations of the cash register:

- ✧ Equence number input operation
- ✧ Digital input operation
- ✧ Name input operation

Sequence Number Input Operation

The sequence number input operation is used to determine the order of the current processing object;

For example: in the programming initial state, press "1" + "SUBTOT" key to enter the department sequence number input state,

The display shows the following:

DEPT Program
 Num: 1
 (Range: 1-200)

Enter the corresponding serial number such as "1" + "SUBTOT", that the user can enter the first part of the department programming;

Digital Input Operation

The digital input operation is an operation for performing digital data input, such as price, inventory, etc.

Note: 1) Not enter the decimal point ".", the default input data is an integer;

2) In addition to the foreign exchange rate input as the 4 decimal places, the other digital input operation defaults to 2 decimal places;

For example: Input data 120.55,

Press "1" + "2" + "0" + "." + "5" + "5"

Input data 100.00,

Press "1" + "00", or "1" + "0" + "0";

Name input operation

Name editing input method can be four, press the "SHIFT" key to switch input method:

- a) T9 Pinyin input method, use "MUL ↑" or "PRICE ↓" to find, can also be found by using "PLU PgDn";
- b) Uppercase (for names with letters in English), use "MUL ↑" or "PRICE ↓" to find, can also be found by using "PLU PgDn";
- c) Lowercase (for programming with lowercase letters), use "MUL ↑" or "PRICE ↓" to find, can also be found by using "PLU PgDn";
- d) Symbols (for names with special symbols), use "MUL ↑" or "PRICE ↓" to find, can also be found by using "PLU PgDn";
- e) Note: 1) If you without enter the characters and press "SUBTOT" directly, that skip the current name of the input;

2) T9 Quanpin input need to use the keyboard keys on the English alphabet A ~ Z to achieve.

Department Programming

Department means the category of goods, such as food, daily necessities;

Department programming refers to programming the attributes, unit price and name of the department;

Departments can be programmed up to 200, each with 6 attributes:

- Department name: Indicates the sales name of the department, 20 characters / 10 characters;

The programming steps are as follows:

-
- 1) Press "MENU" key to enter the system main menu;
 - 2) Press "4" + "SUBTOT" to enter "Program";
 - 3) Press "1" + "SUBTOT" to enter the part sequence number input state, press "SUBTOT" directly to enter the 1 # department programming; enter the sequence number, press "SUBTOT", then enter the corresponding department programming;
 - 4) Enter the name, press "SUBTOT" to confirm, enter the unit price programming;
 - 5) Enter the unit price, press "SUBTOT" to confirm, enter the class attribute programming;
 - 6) Enter the attribute, press "SUBTOT" to confirm, enter the next part of the department programming;
 - 7) Repeat 4) to 6) until 200 parts are programmed;

Press "CASH" to exit the Department of programming state; press "SUBTOT" and then "print" key can print part of the programming data;

[Example: the "DEPT 1" name is set to "daily class", does not allow zero price sales, allowing external printer to print, allow discount and add, the unit price is not set, the operation is as follows:

Press "MENU" + "4" + "SUBTOT" + "1" + "SUBTOT" + "SUBTOT" + characters (daily) + "SUBTOT" + "010000" + "SUBTOT" + "SUBTOT" CASH"]

- Unit Price: Indicates the sales price of the department, 8 digits (including 2 decimal places);
- Department attribute:
A: 0 - Allow Out Print; 1 - Forbid Out Print;
B: 0 - Allow Zero Price; 1 - Forbid Zero Price;
C: 0 - Allow Discount; 1 - Forbid Discount;
D: 0 - Allow Server; 1 - Forbid Server;
E: VATs No.; F: Windows No.;

SPLU Programming

Refers to the cash register commodity price list of the code, name, belong to the class, unit price, membership price, purchase price, inventory, police to be programmed;

Each item has 8 attributes:

- Code: The code is the only sign of the PLU of the cash register, and the different PLU have different codes(Or barcode), 13 digits;
- DEPTNumb: the PLU belong to the department value. 1,2,3 digits;
- Name: PLU name, 20 characters / 10 Chinese characters;

-
- Price: PLU sales price, 8 digits (including 2 decimal);
 - VPrice: VIP price, 8 digits (including 2 decimal places);
 - Purch: PLU purchase price, 8 digits (including 2 decimal);
 - Stock: the inventory for PLU, 10 digits (including 2 decimal places);
 - Warn: PLU inventory alarm, 10 digits (including 2 decimal places);

The programming steps are as follows:

- 1) Press "MENU" key to enter the system main menu;
- 2) Press "4" + "SUBTOT" to enter "Program";
- 3) Press "2" + "SUBTOT" to enter the PLU programming state;
- 4) Enter the PLU code, press "SUBTOT" to confirm, enter the PLU name programming;
- 5) Enter the name, press "SUBTOT" to confirm, enter the PLU department attribute programming;
- 6) Enter the department attribute, press "SUBTOT" to confirm, enter the PLU price programming;
- 7) Enter the unit price, press "SUBTOT" to confirm, enter the VIP price programming;
- 8) Enter the VIP price, press "SUBTOT" to confirm, enter the PLU purchase price programming;
- 9) Enter the purchase price, press "SUBTOT" to confirm, enter the PLU stock programming;
- 10) Enter the number of stocks, press "SUBTOT" to confirm, enter the warn programming;
- 11) Enter the number of warn, press "SUBTOT" to confirm, enter the next PLU code initial input status;
- 12) Repeat 2) ~ 11) until the PLUs are programmed;
- 13) Press "CASH" to exit the PLU programming state; press "SUBTOT" and then press "Print" key to print PLU programming data;

Note: 1) The cash register can identify the electronic scale barcode (including the weight electronic scale barcode and the cash electronic scale barcode), the encoded 13-bit number is defined as follows:

Preamble (2 digits) + PLU code (5 digits) + weight / price(5 digits) + check code (1 bit)

The specific setting of the electronic scale barcode refers to item 15 of "Function programming"

Please refer to item 10 of "Function Parameter Programming" for the specific setting of electronic scale barcode;

[Example: Set item code "366828", name "Apple juice", belongs to the fifth category, unit price of 3, member price of 2.5, purchase price of 2, inventory 50, alarm memory 5, the operation is

as follows:

[MENU+“4”+“SUBTOT”+“2”+“SUBTOT”+“366828”+“SUBTOT”+ Character (Apple juice)
+“SUBTOT”+“5”+“SUBTOT”+“3”+“SUBTOT”+“2.5”+“SUBTOT”+“2”+SUBTOT+“50”+“S
UBTOT”+“5”+“SUBTOT”+“CASH”]

Bill Programming

Programming the head and tail of the receipt printed by the cash register, make receipts meet customer needs and personalization;

There are 30 lines of receipt head and tail, each line has 2 attributes:

- Name programming: 32 characters /16 Chinese characters;
- Attribute programming: 4 digits; 4 digits are defined as follows:
 - A: 0 - Forbid; 1 - Head; 2 - Tail ;
 - B: 0 - Text; 1 - Graphics Mode;
 - C: 0 - Left; 1 - Middle Align;
 - D: 0 - Normal; 1 - Width; 2 - High; 3-Full Zoom

The programming steps are as follows:

- 1) Press "MENU" key to enter the system main menu;
- 2) Press "4" + "SUBTOT" to enter "Program";
- 3) Press "3" + "SUBTOT" to enter the head and tail of the receipt. Press "SUBTOT" directly to enter the first row of programming, input the sequence number and press "SUBTOT" to enter the corresponding row programming;
- 4) Enter the name, press "SUBTOT" to confirm, enter the first line of attribute programming;
- 5) Enter the attributes, press "SUBTOT" to confirm, enter the second line name programming;
- 6) Repeat 4) ~ 5) until 30 lines have been programmed;
- 7) Press "CASH" to exit bill programming status; press "Print" key to print bill programming data;

Note: If the attribute is set to 0000 (not print), then automatically enter the next line of programming.

[Example: set the first line does not print, second line center and width, print "Welcome" operation is as follows:

Press“MENU”+“4”+“SUBTOT”+“3”+“SUBTOT”+“SUBTOT”+“0000”+“SUBTOT”+Welcome
+“SUBTOT”+“1000”+“SUBTOT”+“CASH”]

Cashier Programming

Set the password and name of the cashier, each cashier has its own unique password, cash register machine can be based on the password to distinguish between different cashier;

Up to 50 cashiers, each cashier has 2 attributes:

- Cashier name: 20 characters / 9 Chinese characters;
- Cashier password: 6 digits;

The programming steps are as follows:

- 1) Press "MENU" + "4" + "SUBTOT" + "4" + "SUBTOT" to enter cashier programming, press "SUBTOT" directly to enter the first cashier programming, enter the sequence number, press "SUBTOT", enter the corresponding cashier programming;
- 2) Enter the name, press "SUBTOT" to confirm, enter cashier password programming;
- 3) Enter the password, press "SUBTOT" confirm, enter the next cashier name programming;
- 4) Repeat 2), 3), until cashier programming is completed;
- 5) 5) Press "CASH" to exit cashier programming status; press "SUBTOT" and then press "Print" key to print cashier programming data;

[Example: The "cashier 1" name is set to "Wang Feng" password "223344" operation is as follows:

```
Press["MENU"+"4"+"SUBTOT"+"4"+"SUBTOT"+"SUBTOT"+Wang  
Feng+"SUBTOT"+"223344"+"SUBTOT"+"CASH"]
```

Seller Programming

Set the name of the seller, cash registers can be based on the serial number to distinguish between different sellers;

Up to 100 sellers, each seller has a property:

- Seller Name: 20 characters, /10 Chinese characters;

The programming steps are as follows:

Press "MENU" + "4" + "SUBTOT" + "5" + "SUBTOT" to enter the seller programming status, press "SUBTOT" directly to enter 1 # seller programming, enter the serial number, press "SUBTOT" to enter the corresponding seller programming;

- 1) Enter the seller name, press "SUBTOT" to confirm, then enter the next seller name programming;
- 2) Repeat 1), until the seller programming is completed;

Press "CASH" key to exit salesman programming state; press "SUBTOT" and then press "Print"

key to print seller programming data;

[Example: the name of "Seller 1" is set as "Zhang Jing":

Press "MENU" + "4" + "SUBTOT" + "5" + "SUBTOT" + "SUBTOT" + Zhang Jing + "SUBTOT" + "CASH"]

Table Programming

Programming the number and name of the table, used to enter and print in table sales, the number of tables must be entered when initializing the cash register operation:

Up to 200 tables, each with 2 attributes:

- Table Name: 20 characters / 10 Chinese characters;
- Table Number: 13 digits, used when entering the table number;

The programming steps are as follows:

- 1) Press "MENU" + "4" + "SUBTOT" + "6" + "SUBTOT" to enter the table sequence number input status and enter 2) or 3),
- 2) Press "SUBTOT" directly to enter 1 # table programming;
- 3) Enter the sequence number, press "SUBTOT", then enter the corresponding table programming;
- 4) Enter the name of the table, press "SUBTOT" to enter the table number programming;
- 5) Enter the number, press "SUBTOT" to confirm, enter the next table name programming;
- 6) Repeat 4), 5) until the table programming is finished;
- 7) Press "CASH" to exit the table programming status; press "SUBTOT" and press "Print" key to print the table programming data;

[Example: The "table 1" name is set to "Peony Hall", the table number is "208", the operation is as follows:

Press "MENU" + "4" + "SUBTOT" + "6" + "SUBTOT" + "SUBTOT" + Peony Hall + "SUBTOT" + "208" + "SUBTOT" + "CASH"]

Suit Programming

Suit can be prepared up to 50, suit programming include: suit name, suit properties, suit price, suit items;

Suit attributes: 6 digits; 6-digit specific definition is as follows:

- A: 0 - Allow Out Print; 1 - Forbid Out Print;
B: 0 - Allow Zero Price; 1 - Forbid Zero Price;
C: 0 - Allow Discount; 1 - Forbid Discount;

D: 0 - Allow Server; 1 - Forbid Server;

E: Tax No. F: Window No.;

The programming steps are as follows:

- 1) Press "MENU" + "4" + "SUBTOT" + "7" + "SUBTOT" to enter the suit sequence number input status and enter 2) or 3),
- 2) Press "SUBTOT" directly to enter 1 # suit programming;
- 3) Enter the sequence number, press "SUBTOT", then enter the corresponding suit programming;
- 4) Enter the suit name, press "SUBTOT" to confirm, then enter the suit price programming;
- 5) Enter the price, press "SUBTOT" to confirm, enter the suit attribute programming;
- 6) Enter the attribute, press "SUBTOT" to confirm, enter the number of suits programming (the package allows the number of suits, you can press the "SUBTOT" key to skip);
- 7) Enter the suit item, press "SUBTOT" to confirm, enter the next suit programming;
- 8) Repeat 4) ~ 7) until 50 suits have been programmed;

Press "CASH" to exit the suit programming status; Press "SUBTOT" and then press "Print" key to print suit programming data;

[Example: the "Suit 1" name set to "Beef Suit", the price of 12, the other omitted, the operation is as follows:

Press "MENU" + "4" + "SUBTOT" + "7" + "SUBTOT" + "SUBTOT" + Beef Suit+ "SUBTOT" + "12" + "SUBTOT" + "SUBTOT" + "CASH"]

Taste Programming

Refer to print the name of the taste programming;

Can be edited up to 30 tastes, each taste has a attribute:

- Taste name: 20 characters / 10 Chinese characters;

The programming steps are as follows:

Press "MENU" + "4" + "SUBTOT" + "8" + "SUBTOT" to enter the taste name programming state, directly press the "SUBTOT" to enter # 1 taste name programming, input the serial number, press "SUBTOT" Then enter the corresponding taste name programming

- 1) Enter the name, press "SUBTOT" to confirm, enter the next taste name programming;
- 2) Repeat 1) until the taste name programming is completed;

Press "CASH" to exit the taste programming state; press "SUBTOT" and press "print" key to print taste programming data;

[Example: "Taste 1" is set to "Hot" as follows:

Press “MENU”+“4”+“SUBTOT”+“8”+“SUBTOT”+“SUBTOT”+ Hot +“SUBTOT”+“CASH”]

Sign Programming

Programming the accounting customer's code and name for sign-up settlement at the time of sale;

Up to 200 sign-up customers, each customer has two attributes:

- Customer Name: 20 characters / 10 Chinese characters;
- Sign-up customer code: 13 digit; this attribute is the mark of distinguishing the sign-up customer;

The programming steps are as follows:

- 1) Press "MENU" + "4" + "SUBTOT" + "9" + "SUBTOT" to enter the sign programming mode, press "SUBTOT" directly to enter # 1 sign-up customer programming, enter the sequence number and press "SUBTOT" Then enter the corresponding sign-up customer programming;
- 2) Enter the name, press "SUBTOT" to confirm, enter the sign-up customer code programming;
- 3) Enter the customer code, press "SUBTOT" to confirm, enter the next customer name programming;
- 4) Repeat 2), 3) until 200 sign-up customers are programmed;

Press "CASH" to exit the signing process; press "SUBTOT" and then press "PRINT" key to print the sign programming data;

[Example: The "sign-up customer 1" name is set to "Chen Sheng" number is set to "222333". The operation is as follows:

Press "MENU" + "4" + "SUBTOT" + "9" + "SUBTOT" + "SUBTOT" + Chen Sheng + "SUBTOT" + "222333" + "SUBTOT" + "CASH"]

Payment Programming

Programming the name and exchange rate of payment mode for settlement at time of sale; up to 8 payment modes, 2 attributes for each payment mode:

- Name: 20 characters / 10 Chinese characters;
- Exchange Rate: 10 digits (including 4 decimal places);

The programming steps are as follows:

- 1) Press "MENU" + "4" + "SUBTOT" + "10" + "SUBTOT" to enter payment mode programming;

-
- 2) Press "SUBTOT" directly to enter 1 # payment mode, input sequence number, press "SUBTOT" key to enter the corresponding payment mode;
 - 3) Enter the name, press "SUBTOT" key to confirm, enter exchange rate programming (if you do not input exchange rate, you can press "SUBTOT" key to skip);
 - 4) Enter the exchange rate, press the "SUBTOT" key to confirm, enter the next payment mode programming;
 - 5) Repeat 3), 4) until 8 payment modes have been programmed;

Press "CASH" to exit payment mode programming; press "SUBTOT" and then press "print" key to print payment mode programming data;

[Example: Set "Payment mode 1" as "Check", the operation is as follows:

Press "MENU"+"4"+"SUBTOT"+"10"+"SUBTOT"+"SUBTOT"+ Check
+"SUBTOT"+"SUBTOT"+"CASH"]

Keyboard Programming

Redefine the entire keyboard or some of the keys on the cash register, to set the pattern desired by the user in order to facilitate user operations;

The user can customize the entire keyboard; each key has two defined values:

- Key definition value: Press the corresponding key you want to define;

The programming steps are as follows:

- 1) Press "MENU" + "4" + "SUBTOT" + "11" + "SUBTOT" to enter the key custom input state, according to the input operation of the corresponding button which need to customize to enter the operation;
- 2) Press the "SUBTOT" directly, enter the "SUBTOT" key to customize programming;
- 3) Enter the first function definition value, press "SUBTOT" to confirm, enter the second function definition of this key, enter the second function definition value, press "SUBTOT" to confirm and return to the keyboard definition programming page;
- 4) Press "CASH" to exit keyboard programming status; press "Print" Key to print keyboard programming data;

[Example: Change the first function "CLERK" of the key "CLERK" to "TABLE", the second function remains unchanged. The operation is as follows:

Press "MENU" + "4" + "SUBTOT" + "11" + "SUBTOT" Key, "CLERK" + "↑" or "↓" Choose "Table" + "SUBTOT" + "CASH"]

Function Programming

Set the internal parameters of the cash register, such as communication mode, printing method; Up to 21 function parameters can be edited. Please refer to Appendix A for the definition of specific function parameters.

- Function parameter value: 4 digits;

The programming steps are as follows:

- 1) Press "MENU" + "4" + "SUBTOT" + "12" + "SUBTOT" to enter the function parameter sequence number input status, enter 2) or 3) according to the input operation,
- 2) Press "SUBTOT" directly to enter 1 # function parameter programming;
- 3) Enter the sequence number, press "SUBTOT", then enter the corresponding function parameter programming;
- 4) According to the display prompt, enter the relevant parameter value, press "SUBTOT" to confirm, enter the latter function parameter value programming;
- 5) Repeat 4) until 21 function parameters have been programmed;
- 6) Press "CASH" to exit function parameter programming status; press "SUBTOT" and then press "Print" button to print function parameter programming data;

Date Programming

Set the system time for sales and reporting statistics and printing;

Time / Date has two properties:

- Date (year / month / day): 8 digits;
- Time (hour / minute / second): 6 digits;

The programming steps are as follows:

- 1) Press "MENU" + "4" + "SUBTOT" + "13" + "SUBTOT" to enter the Time/Date programming;
- 2) Enter "year / month / day / hour / minute / second", press "SUBTOT" to confirm, then the cash register will return to the programming state;

Note: The following conditions must be met when entering "year / month / day / minute / second":

- 1) The date must be greater than: 2001/01/01 00/00/00;
- 2) The date must be less than: 2999/12/31 23/59/59;

[Example: Set the current date and time for May 25, 2017, 11: 32: 10 as follows:

Press "MENU" + "4" + "SUBTOT" + "13" + "SUBTOT", "2010525+" SUBTOT "+"113210" + "SUBTOT" + "CASH"]

Outprint Bill Programming

When connecting an external printer to the cash register, program the header and tail of the external printer receipt;

There are 8 lines of external receipts head and tail (4 lines of receipt head, 4 lines of receipt tail), each line has 2 attributes:

- Name programming: 42 characters / 21 characters;
- Property programming: 4 digits; 4 digits are defined as follows:
 - A: 0-Forbid; 1-Head; 2-Tail;
 - B: 0 - Text; 1 - Graphics Mode;
 - C: 0 - Left; 1 - Middle Align;
 - D: 0 - Normal; 1 - width; 2 - High; 3 - Full Zoom

The programming steps are as follows:

- 1) Press "MENU" + "4" + "SUBTOT" + "14" + "SUBTOT" to enter external receipt programming;
- 2) Press "SUBTOT" directly to enter the first line of programming, enter the sequence number, press "SUBTOT" to enter the corresponding line programming;
- 3) Enter the name, press "SUBTOT" to confirm, enter the first line of property programming;
- 4) Enter the property, press "SUBTOT" to confirm, enter the second line name programming;
- 5) Repeat 3), 4) until the 8-line outprint bill programming is completed;
- 6) Press "CASH" to exit the programming status;

Note: If the property is set to 0000 (not print), then automatically enter the next line programming (refer to the bill programming)

VIPs Programming

Set the name of the customer member, the cash register according to the serial number and name to distinguish members;

Up to 1000 members, each member has 6 attributes; 6 specific definition is as follows:

- Member name: 20 characters / 10 Chinese characters;
- Member Code: Member system code;
- Member Phone: Member phone number;
- Member Attribute: not defined;
- Member Discount: Discount for members;
- Member Points: Member points after spending;

-
- Member Amount: Member remaining amount;

The programming steps are as follows:

Press "MENU" + "4" + "SUBTOT" + "15" + "SUBTOT" to enter the member programming state;

- 1) Enter the code, press "SUBTOT" to confirm, enter the name programming;
- 2) Enter the member name, press "SUBTOT" to confirm, enter the member code programming (without changing press SUBTOT to skip);
- 3) Input member customer code, press "SUBTOT" to confirm, enter the phone programming;
- 4) Enter the member phone number, press "SUBTOT" to confirm, enter the property programming (property undefined, press "SUBTOT" to skip);
- 5) Enter the appropriate discount, press "SUBTOT" to confirm, enter the integral programming;
- 6) Enter the member points, press "SUBTOT" to subtract the corresponding points (for points exchange), or press "Clear", enter the corresponding points, enter the next member amount programming;
- 7) Enter the amount of the stored value, press "SUBTOT" to increase the amount (for member recharge), or press "Clear", enter the corresponding amount, enter the next member programming;

Press "CASH" key to exit the member programming state; press "SUBTOT" and then press "Print" key to print the member programming data;

[Example: The "member 1" name is set to "Zhang Jing" operation is as follows:

Press "MENU" + "4" + "SUBTOT" + "15" + "SUBTOT" + "SUBTOT" + Zhang Jing + "SUBTOT" + "CASH"]

Clear System

Initializes the cash register memory and sets all programming parameters to the system defaults, such as cashier name defaults to Cashier 01-50;

- Cash register initialization steps are as follows:
 - 1) Press "MENU" + "4" + "SUBTOT" + "16" + "SUBTOT" + "MUL↑" + "SUBTOT" to enter initialized cash register programming status;

Warning: This operation will restore all programs of the cash register to the factory settings, please use it with caution!

Reset Cash Register Operation

Power-Off if the normal sales operation is not settled or the printing operation is not completed, the power-off protection status will be activated when the cash register reboots, and the original sales or printing operation will continue. However, if the user resets the cash register operation, the cash register will return to the initial status, that is, the sales operation and the printing operation are aborted;

The operation steps are as follows:

- 1) Turn off the power, hold down the "Clear" button, turn on the power;
- 2) If you want to clear the sales records, select Yes; do not clear, press "SUBTOT" to skip, enter the clear function parameters;
- 3) If you need to clear the function parameters, select Yes, do not clear, press "SUBTOT" to skip;

Note: 1. Clear the sales record operation will only clear the sales record, will not clear other cash register settings;
2. Clear function parameters, only clear the system settings have been set;
3. In the boot process, you should hold down the "Clear" button and do not let it go;

System Information

Listed cash register hardware, software version and programming information has been set.

The viewing steps are as follows:

Press "MENU" + "4" + "SUBTOT" + "17" + "SUBTOT" to enter system information view status;

TAX Item Programming

Up to 9 kinds of tax, each tax has 3 attributes:

- Name: Tax Detail Print Name (20 characters / 10 Chinese characters);
- Attributes: A: 1 - Allow Combined Taxes;
B: 1 - Allow Print ;
C: 0 - Manual TAXES, 1 - Auto TAXES;
D: 0 - Contain, 1 - No Contain TAXES;
- Tax rate: Sales tax rate sharp (input 20 means tax rate is 20%);

The programming steps are as follows:

Press "MENU" + "4" + "SUBTOT" + "18" + "SUBTOT" to enter tax programming status;

-
- 1) Enter the sequence number, press "SUBTOT", then enter the corresponding tax programming;
 - 2) Enter the name and press "SUBTOT" to confirm;
 - 3) Enter the property, press "SUBTOT" to confirm;
 - 4) Enter the tax rate, press "SUBTOT" to confirm, enter the next tax programming;
 - 5) Repeat 2) ~ 4), until the nine kinds of tax programming is completed;
- Press "CASH" to exit the tax programming status; press "SUBTOT" and then press "print" button to print tax programming data;

Manual Tax Operation Process

- 1) Selling products when the cash register is in the state of sale of goods;
- 2) Enter the corresponding tax number + "SUBTOT" for manual tax operations;
- 3) Direct settlement, the bill will print the tax information;

Note: To select the corresponding key customize as "Tax" key when manual tax operations

Automatic Tax Operation Process

- 1) The corresponding taxes in tax programming are set to automatic;
- 2) Enter the corresponding tax in the tax code (attribute No. 5) of the department programming;
- 3) Selling products when the cash register is in the state of sale of goods;
- 4) Direct settlement, the bill will print the tax information;

Advanced System Programming Operation

Guide

After system programming, cash registers will be able to fully meet the needs of users, in order to achieve maximum user cash machine availability, cash registers need advanced programming, and all programming operations will be introduced one by one.

Note: In this operation, the machine needs to be in "Advanced Settings" state;

System Backup

All the data in the cash register will be backed up, and when the data or other troubles occur, the backup data will be used to restore the data. (Note: Restart the cash register when resumed.)

- 1: One key backup, backup all data in the cash register;
- 2: One key restore;

Backup and restore operations are as follows:

Backup

- 1) Press "MENU" + "5" + "SUBTOT" + "1" + "SUBTOT" to enter data backup and restore status;
- 2) Press "SUBTOT" to enter the backup; when the backup is completed press "CASH" for other operations;

Restore

- 1) Press "MENU" + "5" + "SUBTOT" + "1" + "SUBTOT" to enter data backup and restore status;
- 2) Enter "2" + "SUBTOT" to enter the restore; after the restore is complete, you need to restart the machine. (Note: To use the restore backup data, you must have the backup data first, in the "data backup and restore" desktop, the date and time are displayed behind the "Last Backup", that you can use one key restore.

WIFI Scan

Cash registers and other terminal network communication settings, through the wireless network scan, you can see the wireless WiFi.

Select the WiFi, enter the correct password, that the cash register can connect to the LAN.

Connect to the WIFI network operations are as follows:

Press "MENU" + "5" + "SUBTOT" + "2" + "SUBTOT" to enter the WIFI scanning status. After a few seconds, the scanned WIFI list will appear;

- 2) Select the WIFI, press "SUBTOT" + "SUBTOT", enter the correct password, that the cash register can connect to the WIFI network;

Network information

Used to check network information;

The operation is as follows:

Press "MENU" + "5" + "SUBTOT" + "3" + "SUBTOT", enter view network information status;

Manager Report Operation Guide

After printing the corresponding report, you can select the temporary report and clear report, the next sales data will be re-statistics;

Operation steps	Report type
“1”+“SUBTOT”	DEPT Report
“2”+“SUBTOT”	SPLU Report
“3”+“SUBTOT”	Finance Report
“4”+“SUBTOT”	Cashier Report
“5”+“SUBTOT”	Seller Report
“6”+“SUBTOT”	Table Report
“7”+“SUBTOT”	Suit Report
“8”+“SUBTOT”	Hour Report
“9”+“SUBTOT”	Sign Report
“10”+“SUBTOT”	Refund Report
“11”+“SUBTOT”	Sale Report
“12”+“SUBTOT”	Hold Report
“13”+“SUBTOT”	VIPs Report
“14”+“SUBTOT”	Combined Report
“15”+“SUBTOT”	Clear Report

DEPT Report

Record all departments' specific sales.

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "1" + "SUBTOT" to print DEPT Report;

PLU Report

Record all PLUs' specific sales;

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "2" + "SUBTOT" to print SPLU Report;

Finance Report

Record the sales period of specific sales;

Financial report can be divided into three categories: Non-commodity sales (such as discount,

Rounding zero), sales settlement types (such as cash, foreign exchange) and the overall sales;
A total of 19 items: Sales start date, discount, preferential, number of people, service charge,
surchage, wiping zero, return, cancel, cash in, cash out, cash, credit card,
sign bill, other methods of settlement (8 kinds), open the cash box
number, turnover;

Note: the calculation formula of financial report:

Total amount = DEPT sales + PLU sales

Turnover = amount total – discount/deal + wipe zero + additional

Or = various billing methods

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "3" + "SUBTOT" to print Finance Report;

Cashier Reoprt

Record sales of each cashier sales period;

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "4" + "SUBTOT" to print Cashier Report;

Seller Report

Record the sales of each salesperson during business hours;

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "5" + "SUBTOT" to print Seller Report;

Table Report

Record the sales of all the tables;

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "6" + "SUBTOT" to print Table Report;

Suit Report

Record suits specific sales;

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "7" + "SUBTOT" to print the Suit Report.

Hour Report

Record sales hourly (24 hours total);

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "8" + "SUBTOT" to print Hour Report;

Sign Report

Record the sales of each sign-up customer;

You can input the serial number to print and clear the sales record of a single sign-up customer.

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "9" + "SUBTOT" to print Sign Report;

Refund Report

Record the return of goods;

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "10" + "SUBTOT" to print the Refund Record;

Sale Report

Record the sales of goods;

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "11" + "SUBTOT" to print Sale Record;

Hold Report

Record sales schedules for existing tables (not yet settled);

The hold list is arranged in accordance with the order of the table, a total of nine records:

Table name, product code (for PLU), product name, sales volume, sales unit price, sales amount, discount, service fee and total amount;

You can enter a table number to print and clear sales records for a table.

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "12" + "SUBTOT" to print the Hold Report;

VIP Report

Record all members of the specific sales;

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "13" + "SUBTOT" to print VIPs Report ;

Combined Report

Contains a variety of reports, "a variety of reports" is the system settings have been set to print the report;

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "14" + "SUBTOT" to print Combined Report;

Clear Report

Clear all the reports in the cash register;

The operation steps are as follows:

Press "MENU" + "3" + "SUBTOT" + "15" + "SUBTOT" to clear (Clear swap report, half sale record and all sale record);

Cashier Report Operation Guide

The cash register only prints the corresponding report without clearing the report data, and the next sales data will continue to accumulate statistics;

This chapter includes:

Operation steps	Report type
"1"+"SUBTOT"	DEPT Report
"2"+"SUBTOT"	SPLU Report
"3"+"SUBTOT"	Finance Report
"4"+"SUBTOT"	Cashier Report
"5"+"SUBTOT"	Seller Report
"6"+"SUBTOT"	Table Report
"7"+"SUBTOT"	Suit Report
"8"+"SUBTOT"	Hour Report
"9"+"SUBTOT"	Sign Report
"10"+"SUBTOT"	Refund Report
"11"+"SUBTOT"	Sale Report
"12"+"SUBTOT"	Hold Report
"13"+"SUBTOT"	TAX Report
"14"+"SUBTOT"	Combined Report

The operation method is the same as the operation of the manager report. Please refer to the operation of the corresponding manager report.;

Sales Operation Guide

Refers to the process of good sales, cash registers will automatically record all the transaction

data provided to the user for analysis;

The specific definition is as follows:

- | | |
|-----------------|---|
| 1.Cashier Login | Used to switch the cashier; |
| 2.Seller Login | Used to switch the cashier; |
| 3.Find Goods | Query commodity information in sales; |
| 4.Input Qty. | Enter the number of pieces sold; |
| 5.Input Price | Enter the temporary price of the commodity; |
| 6.Input Cash | Input commodity amount; |
| 7.Bill Copy | Copy the last bill; |
| 8.Outprint Bill | Print kitchen bill; |
| 9.Print On/Off | Off /On the printer; |
| 10.Open cashbox | Open the cashbox; |
| 11.Cash In | Add the initial amount in the cash box |
| 12.Cash Out | Reduce the amount of cash in the cash box; |
| 13.PLU Sale | Single item sales; |
| 14.DEPT Sale | Department commodity sales; |
| 15.Suit Sale | Package commodity sales; |
| 16.DPLU Sale | Single commodity sales; |

17.Table Sale	Open table sales;
18.Refund Sale	Customer returns;
19.VIP Sale	Sell at member price;
20.Payment Operation	Other settlement methods;
21.Discount Operation	Commodity discount operation;
22.Coupon Operation	Commodity preferential operation;
23.Server Operation	Separate amount of discount plus;
24.Premium Operation	Charge a separate amount;
25.Rounding Operation	Last number rounded;
26.Correction Operation	Cancel current commodity;
27.Cancel Operation	Cancel current commodity;
28.Taste Operation	Taste information display;
29.Table Hold	Temporarily settled open table;
30.Table Restore	Open table recovery sales;
31.Table Move	Open table transfer to other stations;
32.Input Code	Enter the code of sales commodity ;
33.Input # Of People	Number of people entered;
34.Tax Item Operation	Commodity tax options;
35.Sales Debug	Commodity sales debugging;

Appendix A: Function parameter definition list

	Serial number	Name / default parameter number	Parameter explanation
F u n c t i o n a l	1	commaddr: 0001	→Set up machine number,0001 represents machine number 1
	2	Com speed: 9600	→Optional slow(9600)、Middle(19200)、Fast(38400)、Maximum(115200)
	3	Bill No: 0001	→Set up bill no,0001represents bill no 1
	4	Refund password 000000	→Enter a 6-bit refupass password, default 000000, control: commodity refupass
	5	Manual passw 000000	→Enter a 6-bit password,default 000000,control Report bill Program Passw.
	6	Print Parameter:	→A:1-Forbid Print
			→B:1-Allow No Paper
			→C:0-9,Line Space
			→D:0-6,Print Density
	7	Bill Form:	→A:1-Print Header
			→B:0-9,Bill Space
			→C:1-WaterWidt 2-High 3-All
			→D:1-NameWidt 2-High 3-All
	8	Sales Parameter 1	→A:1-Print PLU Code
			→B: 1-Forbid Price Input
			→C:1-SubTot Cash Discount
			→D:1-Auto Taxi
	9	Sales Parameter 2	→A:1-Window Print
		→B:1-Single Print	
		→C:1-Manual 2-Auto Copy	

Serial number	Name / default parameter number	Parameter explanation
		→D:1-9,Copy Bills
10	SalePara 3	→A:1-Auto Clear Half Record
		→B:1-Allow Stock & Warning
		→C:0-4,Cash Digit
		→D:1-Print Valid Data
11	Discount Parameter	→AB:Maximum Discout Rate
		→CD:Default Discount Rate
12	Service Parameter	→AB:Maximum Serve Rate
		→CD:Default Serve Rate
13	Round zero	→A:1-Allow Auto WipeZero
		→B:1-Forbid Print WipeZero
		→C:1-TenCent 2-Cent Wipe
		→D:1-GiveUp 2-4Gi5Ad 3-Adds
14	VIP Parameters	→A:1-Allow Auto Discount
		→B:1-4,Integration Mode
		→C:1-Allow Stored Cash Card
		→D:0-CodeFind 1-Serial Find
15	BarcCode	→A:1-Qty.Code 2-CashCode 3-Qty.Elec 4-CashElec
		→B:0-4,Cash Digit
		→CD:2 Barcode Header
16	OutPrint	→A:1-OutPrint1 2-Outprint2 3-OutPrint3 4-Label
		→B:0-57/30*20 1-80/40*30mm
		→C:0-4,Cutter Mode
		→D:0-Copy1-Kitc2-Wind3-Sing
17	Printer Bill Space	→A:Header Space Line
		→B:Footer Space Line
		→C:Line Space
		→D:1-NameWidt 2-High 3-All
18	port Devices	→A:1-USB Host 2-USB Commu 3-PS2 Keyb 4-PS2 Barcode

Serial number	Name / default parameter number	Parameter explanation
		→B:1-Close Voice
		→C:Reserved
		→D:1-Forbid Report View
19	ReptPara	→A:1-Report SPLU Code
		→B:1-Print Stock & Profit
		→C:1-Auto Clear Water No.
		→D:1-Auto Clear Report No.
20	Repeipt Combo	→A:1-Fina 2-DEPT 4-SPLU

Appendix C: Cash Register Peripherals

Connection Guidelines

1. Connect to the computer; (steps: 1. Connect the serial cable to the cash register "communication" interface, Set the machine number of cash register as "1" by default, then set the corresponding baud rate as 9600,19200,38400,115,200;

2. The USB cable is connected to the USB interface of the cash register, set the machine number of cash register as "1" by default.

2. Connect barcode scanner; (Step: connect barcode scanner to "barcode" interface, set the corresponding baud rate as 9600,19200,38400,115,200)

3. Connect the external printer; (Step: connect the printer to the "communication" interface of the cash register, set the corresponding value of item 16th of "kitchen setting" in function parameter)

4. Connect the electronic scale; (Step: connect the electronic scale to the "communication" interface of the cash register and set the corresponding "A" value of item 15th of the function parameter)

5. Connect the external keyboard; (Step: connect keyboard to "PS2" interface, set item 18th "peripheral controls" and corresponding values for the function parameters)

6. Connect the barcode scanner; (Step: connect barcode scanner to "PS2" interface, set item 18th "peripheral controls" and corresponding values for the function parameters)

7. Connect the MSR; (Step: member swipe card reader connect to "barcode" interface)
