

Your value must be kept precious.

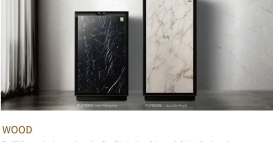

PALLADIUM

PALLADIUM is a top-level premium safe made by 35-year-old Diplomat Safe's high technology and skilled craftsmanship. It is an entirely different luxury safe in design and technology which can't be compared with others. **PALLADIUM** looks simple but elegant with durability and security. Please experience the beauty of simplicity and security in **PALLADIUM**.

MARBLE

Marble design panels are Italian-made Porcelain which has 100% same feeling and look as genuine marble. The harmony of elegant marble and cold feeling metal in **PALLADIUM** will infuse dignity into the space.

WOOD

The 100% German-made unique veneer shows a piece of beautiful nature. You can feel warm and soft texture of genuine wood. The wooden panel on the black cabinet will make your room appear more dignified.

METAL

Safe made of golden color stainless panel maximizes the simple and elegant beauty of **PALLADIUM**. You may experience an atmosphere of modern design and refinement in metal itself.

DESIGN

Under the Diplomat Safe design philosophy "Safe is Furniture", **PALLADIUM** is an object designed in motif of high-end furniture. There is no externally exposed handle, electronic lock or any feature in **PALLADIUM**.

Luxury Furniture Design Safe

Beauty of straight line by high-tech metal processing skills and scientific atmosphere exist in every part of **PALLADIUM**.

Chrome-plated Heavy Anti-Drill Bolts

20 pieces of alloy bolts interworking to four directions. They are mounted solidly and shield against water-tight colored safety body materials.

Finger-print Sensor / Touch Panel

This tempered glass has a parallel finger print sensor on top of the safe, any physical component of locking system is not exposed outside. It is rationally designed for easy opening and closing.

INTELLIGENCE

Security system integrated with most advanced security and IoT communication technology is strong enough to protect your valuables in **PALLADIUM**.

IoT System

Best IoT system features of the state-of-the-art safe such as opening/closing, backup, make temperature, humidity and air pressure sensor outside phone functions.

Finger-print Authentication System

20 different finger prints can be registered in the system. The accurate finger print sensor offers excellent authentication performance and can be configured with password system.

Dual Fire-Resistant Locking System

There are two kinds of independent electronic locking systems in **PALLADIUM**. If the main system doesn't work properly, the back system operates auto-ventilate safe.

SECURITY

Three-fold steel frames with reinforcement plates and 12pcs of 32mm diameter alloy bolts protect the safe against outside attack. In addition, **PALLADIUM** passes 60mins fire-resistance test under KS3000mm industrial standard certification.

Weight	Capacity	Maximum thickness	Standard
