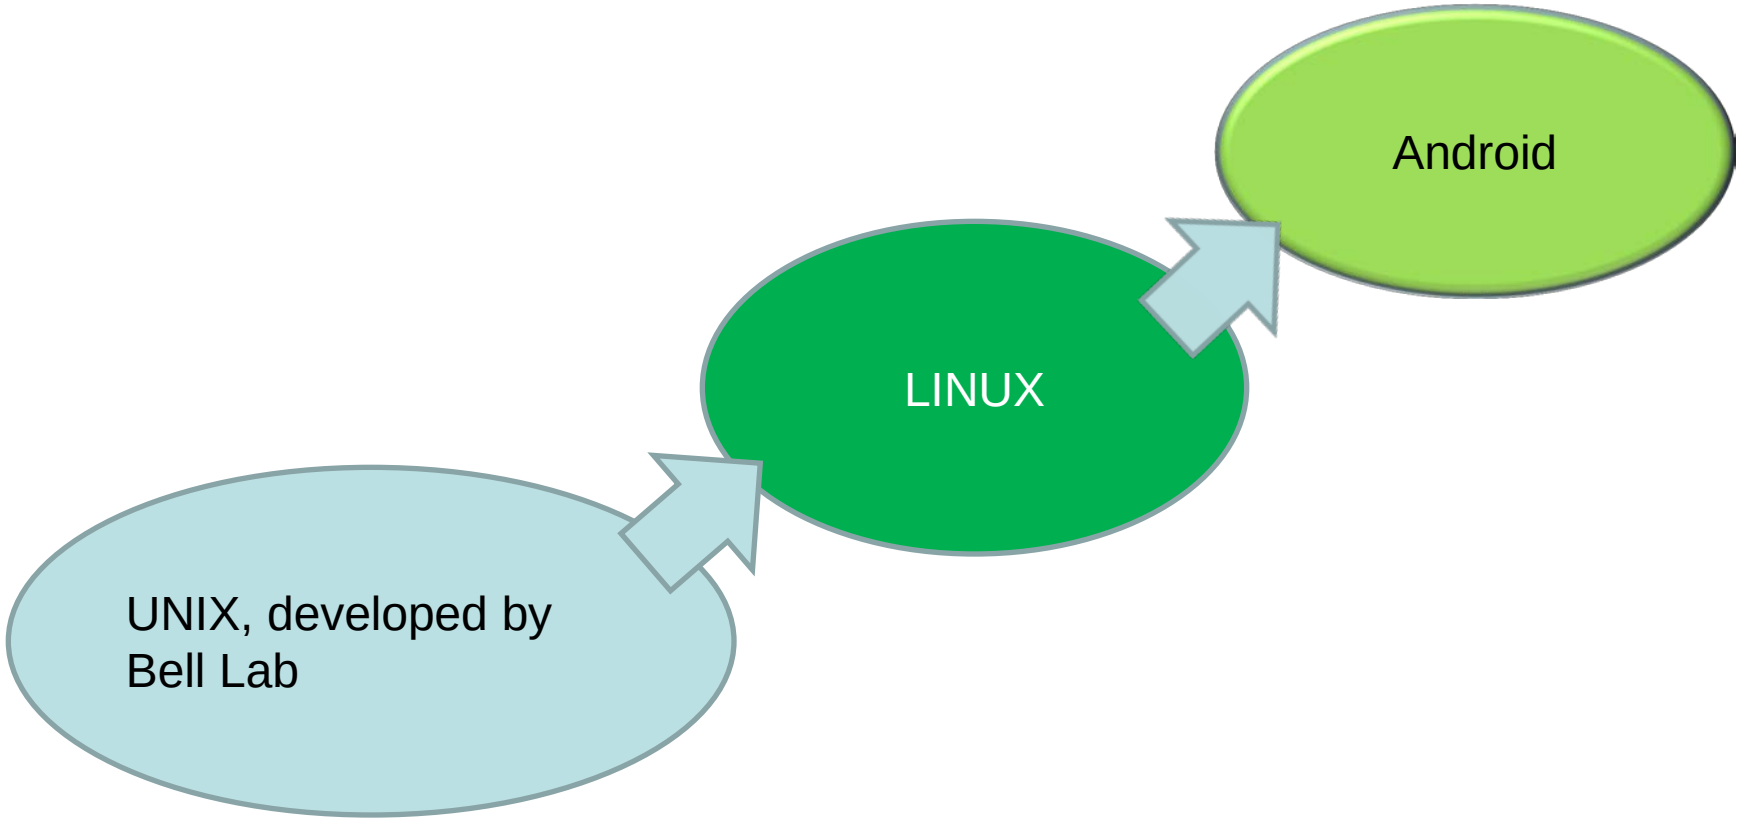
Android System

- Based on the powerful, stable UNIX system
- Extremely reliable and robust
- Compact & efficient [less hardware expense]
- Highly configurable
- Feature-rich for future expansion
- Cutting edge hi-tech
- **Free** user license
- Inherent virus protection



Most think Android is for mobile or cell phones, but really it is a version of UNIX that runs on small but powerful micro-computers.

Enough of the ‘tech’ talk

What do you need?

- Stability
- Reliability
- Expand as you grow
- Security
- Easy to use for low training cost and no mistakes
- Near zero maintenance

Enough of the ‘tech’ talk

And what else do you need?

- One time low fixed cost
- Single vendor
- Stay ahead of the competition
- Low install cost
- Small foot-print
- Ease of repair / replacement

Enough of the ‘tech’ talk

Further, do you need?

- Modern look
- Flexibility
- Solid support
- Accurate and complete reports at your fingertips

MiniTouch is your answer
