

MiniTouch Keyboard

It integrates creative functions, e.g. mechanical keyboard, NFC card reader, consumer display and purple cash detector, and ensures the best user experiences.

1. Consumer display embedded smoothly in the backside in a good human readable angle.
2. The purple cash detector is placed at so good an angle that user could detect cash exactly before the cash is put into cash drawer or pocket.
3. The back side hides cables inside the box. It ensures the elegance and functionality.
4. There is a slop in swiping area. The card will be dropped off after swiping. In this way, the card will not be forgot in the restaurant.
